GLORIOUS GLADIOLI

The Flower of the Moment

Their stately spikes of immense and shapely individual flowers, decked out in brilliant colouring and magnificent markings, place modern Gladioli on a pedestal in the hearts and minds of all flower lovers.

But when we remember their long lasting qualities—the range of self colours (from the softest and daintiest to the most brilliant and bizarre)—the daring colour schemes where two or more shades are brought together by Nature in the same flower—and the fact that by successive plantings, in mild climates, they may be induced to produce their colourful and majestic flower spikes for nearly the whole year round—then, indeed, is the true value of the better kinds of Gladioli fully realised, and people who take a real interest in maintaining high-class and distinctive gardens use Gladioli extensively to that end.

As cut flowers, Gladioli stand pre-eminent. They command high prices for the blooms, and are easy to grow.

We specialise in Gladioli—our bulbs are of large size—clean and healthy—and, above all, they are **TRUE TO NAME**.

You cannot afford to waste time and money on bulbs from any except the most reliable source. Cheap bulbs are **DEAR** in the end!
